

# Operational Support

## Our Approach

System evaluations provide valuable insights into the current operating conditions of a system. Our team can help identify the problem areas and help you achieve treatment optimization. From emergency upset response to long-term data collection, EBS can help you get the most out of your treatment system.

## Aeration Basin Evaluations

- Depth Surveys
- Aerial Imagery
- Tracer Studies
- Solids Handling Audits

## On-site Support

- Historical Data Review
- Customized Training
- Focused Consulting
- Outage or Upset Response
- Routine Service Visits

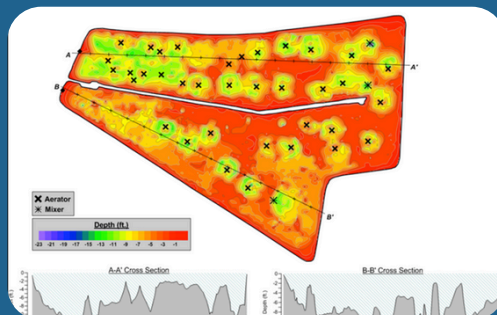

### Drone Surveys

Drone surveys provide a unique view through thermal and high-resolution images.

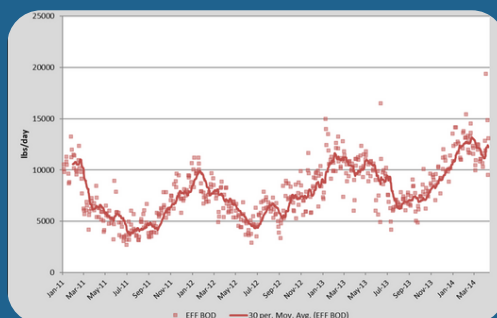

### USV Depth Surveys

Hydrographic surveys with USVs offer safe, effective, and accurate data collection.

### Bathymetry Map

Bathymetry map of treatment pond depth

### Historical Data Review

Seasonal swings in BOD and performance loss over time

” EBS has provided excellent service with very knowledgeable and professional representatives....When issues arise, EBS has the resources to respond with meaningful help and expertise to guide us as needed. EBS is truly a partner in managing our wastewater process.

-Pulp and Paper Technical Manager

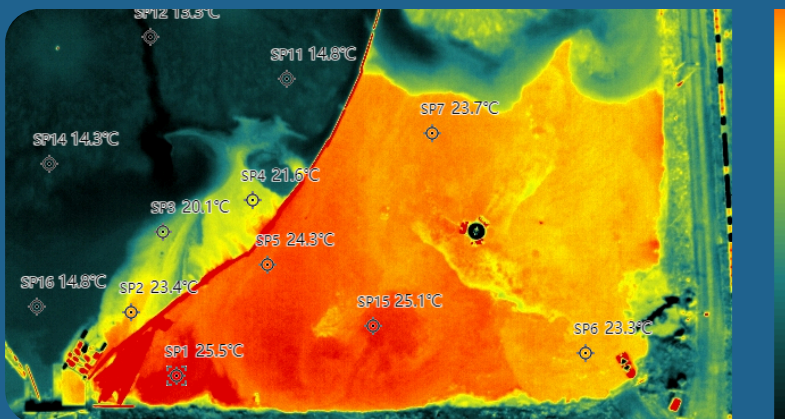

## Why Choose Us?

**1** Quick response when you need us most.

**2** Advanced equipment is used to collect precise data.

**3** Our team collectively holds more than 300 years of experience in wastewater management.

At EBS, our goal is to help our clients identify and solve wastewater treatment problems promptly and cost-effectively. Our holistic approach creates long-term solutions that help wastewater systems meet their compliance goals and avoid costly EPA fines. EBS evaluates your entire system, determining what is needed. We provide a comprehensive selection of field and service options, as well as high-quality wastewater treatment solutions, chemical and microbiological evaluations, and treatability studies.
